EVENT **12/10/2015**

Four months after the UITP World Congress & Exhibition, we're back in Milan – this time for **Move.App Expo**, an international meeting on public transport, smart mobility and logistics taking place from 10 to 15 October.

In the framework of the Move.App Conference, UITP co-organised today a session on the financing and governance of public transport. This session was moderated by Sylvain Haon, Director of UITP's Knowledge and Membership Services Department, and addressed the challenges of financing and funding public transport projects, with a special focus on Italy since its governance framework has been changing.

Besides the conference, the Move.App international exhibition features innovative projects, mock-ups and technologies. Amongst them, the city of Cagliari presented a zero emission trolleybus tested in the framework of the UITP coordinated [ZeEUS](#) project.
